

COVID-19 Situation Update for Allegheny County

December 4, 2020

This document is intended to provide a regular update on the local response to COVID-19 in our communities and timely, trended data related to COVID-19. This report will be published on Fridays.

“We are at a critical point in our response efforts, and we don’t want to see a spike in cases that will strain our healthcare system. We have the tools to slow the spread and protect our healthcare capacity. We urge everyone to show your love and wear a face covering, wash your hands and wait 6 feet from others,” stated Jennifer Greene, Health Director, AppHealthCare.

Key Points

Cases decreasing over past few weeks

Over the past few weeks, we have seen a steady decline in cases. For the week of November 22-28 (graphs below), there have been decreases in active cases and those who are in quarantine. Even though the data is trending down, we must not let our guard down and continue practicing prevention measures like the 3Ws.

Hospitalizations

Allegheny Health is prepared and ready to take care of you should you need care. We want to monitor this data point very closely because it is important we have hospital capacity for those who may need hospital care for things like a heart attack, stroke, car accident, etc.

NC DHHS County Alert System Notes Significant Community Spread for Allegheny County

Allegheny County is **YELLOW** which notes significant community spread. This system outlines actions we can take to lessen the impact and spread in our community. You can read more about the [County Alert System on NC DHHS's website](#).

NC Counties by Tier: Data from November 6 through November 19, 2020

We continue case investigation and contact tracing efforts to reduce the spread of COVID-19. If you receive a call from a member of our case investigation or contact tracing team, we urge you to cooperate and provide information that will help us conduct response efforts. You may receive a call

from (844) 628-7223 or (828) 264-4995. It may also show up as “NC Outreach” or “Contact Tracing.” Your cell phone carrier may flag the call as spam. It is so important to answer the call of a contact tracer. It is a key tool in slowing the spread of this virus.

Personal Protective Equipment (PPE) levels remain stable in most areas.

Testing

If you have COVID-19 symptoms or have been exposed to someone with COVID-19, we recommend you be tested. You can [check your symptoms](#) and determine if testing is needed. To find a testing site near you, visit [NC DHHS's Find My Testing Place](#).

Turnaround Times for Testing remains between 2 and 4 days. NC DHHS provides data on testing turnaround times. This data is updated daily and can be found [here](#).

Free COVID-19 Testing at AppHealthCare. We offer free COVID-19 testing Monday through Friday beginning at 9:30am. Please do not just show up for testing. We request that you schedule an appointment through our [website](#) or by calling our COVID-19 Call Center at (828) 795-1970.

Testing is also offered by appointment at Alleghany Family Practice at (336) 372-5606 and other local healthcare providers may offer testing as well.

Guidance Documents to Prevent & Slow the Spread

Tips for Holiday & Private Social Gatherings

As we continue through the Holiday season, we encourage everyone to be mindful of the fact that this virus is still with us and there are actions we can all take to avoid and lessen our exposure and a potential spike that could overwhelm our healthcare system. If you will be hosting or attending an event, NC DHHS has compiled some [tips for gathering safely](#) and some [guidance for private social gatherings](#).

NC DHHS Guidance for Ski Lodges

As we see the start of ski season, guidance has been developed by NC DHHS to decrease the spread of COVID-19. [This guidance](#) includes requirements and recommendations for Ski Lodges.

Active Outbreaks and Clusters

Data is provided for outbreaks and clusters that are active and ongoing. The number of cases for outbreaks and clusters are current as of each Thursday at 9:00am. The case counts vary day by day as new cases are identified and as cases are moved in and out of isolation. This data may not match other reported data since this is a point in time. As we conduct outbreak and case investigations, the data included in this report are subject to change. For a current case count, visit the [AppHealthCare data dashboard](#), which is updated daily by noon.

An outbreak is defined as two or more laboratory confirmed cases. A cluster is defined as a minimum of five cases with illness onsets or initial positive results within a 14-day period and plausible epidemiologic linkage between cases. An outbreak or cluster is considered over if 28 days have passed after the latest date of symptom onset in a symptomatic person or first date of specimen collection from the most recent asymptomatic person, whichever is later. Additional information on the [definitions of outbreaks and clusters](#) is provided by the North Carolina Department of Health & Human Services.

NC DHHS also provides regularly updated information on [outbreaks and clusters](#). A newly added “COVID-19 Clusters in North Carolina” report includes aggregate data of settings where clusters are occurring. These settings include workplaces, shopping services, community events, etc. This report will be updated each Monday.

Active Outbreaks & Clusters <i>Data is current as of Thursday, December 3, 9:00am</i>				
Facility or Setting Type	Facility or Setting Name	Active Cases	Cumulative Cases	Last Positive Result
Residential Group Home	Alleghany Group Home	0	5 residents 4 staff	11/17/2020

Mitigation and Response Efforts

- Ongoing testing continues to monitor the health of residents in skilled nursing facilities
- Ongoing testing continues to monitor the health of residents in residential group home
- Educational outreach on COVID-19 prevention
- Communication, internal and external
- Positive cases are separated from others to allow for safe isolation
- Ongoing daily health monitoring is occurring under the direction of Bottomley Evergreens and Farms to identify sick workers so they can get the care they need
- Monitoring of positive cases continues with public health staff

Demographic Data from NC DHHS as of November 30th

NC DHHS updates this data daily and can be found on [NC DHHS's website](#).

Data for Alleghany County

An important note about data context: The graphs below show the available data. Please carefully read the descriptions below the graph to understand the data limitations. The most current data is available on the [AppHealthCare dashboard](#), as the data below is past data trended.

Important Disclaimer About Data

It is imperative that this report and the data contained within is understood in the appropriate context. Please, if you use this report, please be certain that the information included within is shared within the appropriate context. Doing otherwise may be damaging to the public health response efforts. There are multiple factors involved in addressing this virus, including compliance with public health control measures implemented by the local health director and referenced in NC GS 130A. These measures are imperative for limiting the spread of COVID-19. **AppHealthCare strongly advises that when data is shared for the purposes of educating the public or informing policy decisions, it should come directly from NC DHHS or AppHealthCare as it is presented with appropriate context from those directly involved in public health response.**

**Cumulative Case Count by Week in Alleghany County
(October 18 - November 28, 2020)**

CUMULATIVE CASE
COUNT
(As of 11/28/20)

421

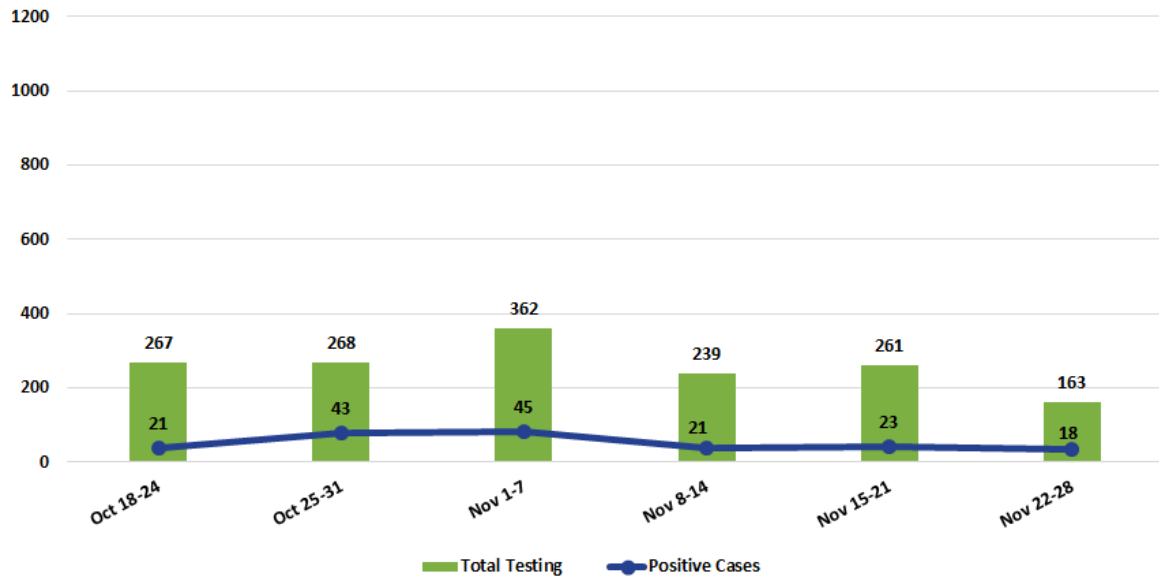

The solid navy blue line in this graph represents the number of positive COVID-19 cases among Alleghany County residents by week. This graph also shows the number of non-residents that have tested positive for COVID-19 but reside in another county.

**Number of Active Positive Cases by Week in Alleghany County
(October 18 - November 28, 2020)**

The graph represents the number of active COVID-19 positive cases by week in Alleghany County. A positive COVID-19 case is considered active for ten days after the initial positive test result.

**Total Weekly Tests Reported vs. Weekly Case Count in Allegheny County
(October 18 - November 28, 2020)**

This graph represents the number of COVID-19 positive cases by week in Allegheny County compared to the total number of reported tests that were completed by AppHealthCare and outside agencies each week in Allegheny County.

**Number of People Being Actively Monitored by Week in Allegheny County
(October 18 - November 28, 2020)**

This graph represents the total number of Allegheny County residents that AppHealthCare staff have monitored due to being exposed to a confirmed COVID-19 case. Individuals are notified and asked to quarantine and monitor for symptoms for fourteen days.

Additional data can be found on [AppHealthCare's data dashboard](#). This data is updated each day around noon.
