

COVID-19 Situation Update for Ashe County

May 14, 2021

This document is intended to provide a regular update on the local response to COVID-19 in our communities and timely, trended data related to COVID-19. This report will be published on Fridays.

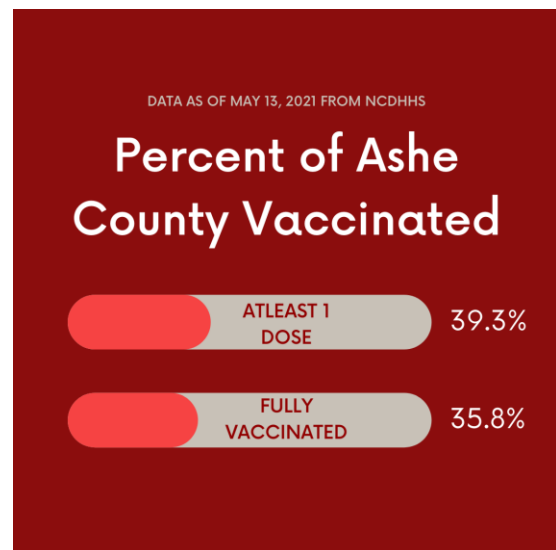

Vaccinating Makes Everyone Safer - COVID-19 Vaccine Update

Vaccinating makes everyone safer. If you are interested in getting your vaccine, there is a spot for you. Visit our website to schedule an appointment or call us at (828) 795-1970. Show your love by getting a vaccine to help slow the spread of COVID-19 in our community.

Who is eligible for vaccines?

COVID-19 vaccine appointments are open for those who want a vaccine within the age requirements. The Pfizer vaccine is now approved for people ages 12 and older and all other vaccines are approved for 18 and older. Vaccine appointments will be added to our website as they are available based on vaccine supply so continue to check back regularly for additional appointments to be added. Currently, our vaccine appointments are for Moderna and Johnson & Johnson. At this time, we do not get regular shipments of Pfizer and therefore do not have appointments available for Pfizer. However, Boone Drugs does receive a regular shipment of Pfizer and are open for appointments. For more information about a first dose appointment visit, boonedrug.com/covid-vaccine.

Are you interested in hosting a pop-up vaccination event?

A pop-up vaccination clinic is another way to make vaccines available to our community. Pop-up events are intended to provide more access to vaccines and reduce transportation, technology and geographic barriers. Pop-up events can be set up at businesses, community agencies, existing events and more! If you are interested in hosting an event or for us to come to your business/event, please complete the interest form ([English form](#) and [Spanish form](#)) and a member of our vaccination team will contact you.

The vaccine is free for everyone, regardless of your immigration status. You do not need to show proof of insurance, social security number or an ID if you do not have it.

To learn more about the COVID-19 vaccine, visit our website [here](#) or NC DHHS's website [here](#).

Key Points

Case Updates

For the week of May 2-8 (graphs below), cases remain steady.

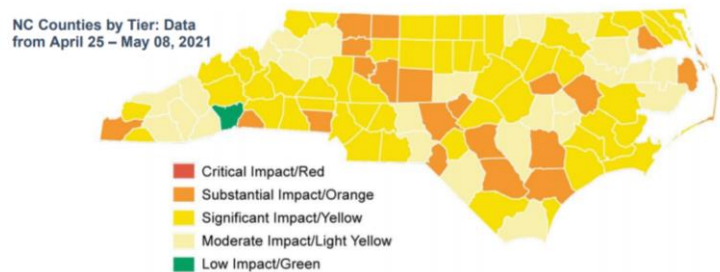

Statement from Ashe Memorial Hospital

As COVID-19 continues to impact our neighbors and surrounding counties, we encourage everyone to do their part to help reduce the spread of COVID-19 by wearing a mask, washing their hands, and social distancing whenever possible. The safety and well-being of our community is our top priority. We have protocols in place to ensure that we are able to meet the needs of our patients and our community.

NC DHHS County Alert System Notes

Significant Impact for Ashe County

In the latest update, Ashe County is **YELLOW** which notes significant impact. This system outlines actions we can take to lessen the impact and spread in our community. You can read more about the [County Alert System on NC DHHS's website](#).

We continue case investigation and contact tracing efforts to reduce the spread of COVID-19. If you receive a call from a member of our case investigation or contact tracing team, we urge you to cooperate and provide information that will help us conduct response efforts. You may receive a call from (844) 628-7223 or (828) 264-4995. It may also show up as “NC Outreach” or “Contact Tracing.” Your cell phone carrier may flag the call as spam. It is so important to answer the call of a contact tracer. It is a key tool in slowing the spread of this virus.

Testing

If you have COVID-19 symptoms or have been exposed to someone with COVID-19 (regardless of whether you have symptoms or not), we recommend you be tested. You can [check your symptoms](#) and determine if testing is needed. To find a testing site near you, visit [NC DHHS's Find My Testing Place](#).

Turnaround Times for Testing remains between 2 and 4 days. NC DHHS provides data on testing turnaround times. This data is updated daily and can be found [here](#).

Free COVID-19 Testing at AppHealthCare by Appointment. We offer testing on Monday and Thursday each week unless otherwise noted. Please do not just show up for testing. We request that you schedule an appointment through our [website](#) or by calling our COVID-19 Call Center at (828) 795-1970.

Testing is also offered by appointment at Mountain Family Care Center (336) 846-6322 (located on the campus of Ashe Memorial Hospital), [CVS Pharmacy in West Jefferson](#), [Ashe Pediatrics](#) and other local healthcare providers may offer testing as well.

Active Outbreaks and Clusters

Data is provided for outbreaks and clusters that are active and ongoing. The number of cases for outbreaks and clusters are current as of each Thursday at 9:00am. The case counts vary day by day as new cases are identified and as cases are moved in and out of isolation. This data may not match other reported data since this is a point in time. As we conduct outbreak and case investigations, the data included in this report are subject to change. For a current case count, visit the [AppHealthCare data dashboard](#), which is updated Monday through Friday by noon.

An outbreak is defined as two or more laboratory confirmed cases. A cluster is defined as a minimum of five cases with illness onsets or initial positive results within a 14-day period and plausible epidemiologic linkage between cases. An outbreak or cluster is considered over if 28 days have passed after the latest date of symptom onset in a symptomatic person or first date of specimen collection from the most recent asymptomatic person, whichever is later. Additional information on the [definitions of outbreaks and clusters](#) is provided by the North Carolina Department of Health & Human Services. NC DHHS also provides regularly updated information on [outbreaks and clusters](#).

Data for Ashe County

An important note about data context: The graphs below show the available data. Please carefully read the descriptions below the graph to understand the data limitations. The most current data is available on the [AppHealthCare dashboard](#), as the data below is past data trended.

Important Disclaimer About Data

*It is imperative that this report and the data contained within is understood in the appropriate context. Please, if you use this report, please be certain that the information included within is shared within the appropriate context. Doing otherwise may be damaging to the public health response efforts. There are multiple factors involved in addressing this virus, including compliance with public health control measures implemented by the local health director and referenced in NC GS 130A. These measures are imperative for limiting the spread of COVID-19. **AppHealthCare strongly advises that when data is shared for the purposes of educating the public or informing policy decisions, it should come directly from NC DHHS or AppHealthCare as it is presented with appropriate context from those directly involved in public health response.***

**Cumulative Case Count by Week in Ashe County
(March 28, 2021 - May 8, 2021)**

CUMULATIVE CASE COUNT
(As of 5/8/21)
2,225

The solid navy blue line in this graph represents the number of positive COVID-19 cases among Ashe County residents by week. This graph also shows the number of non-residents that have tested positive for COVID-19 but reside in another county.

**Number of Active Positive Cases by Week in Ashe County
(March 28, 2021 - May 8, 2021)**

The graph represents the number of active COVID-19 positive cases by week in Ashe County. A positive COVID-19 case is considered active for ten days after the initial positive test result.

**Total Weekly Tests Reported vs. Weekly Positive Case Count in Ashe County
(March 28, 2021 - May 8, 2021)**

This graph represents the number of COVID-19 positive cases by week in Ashe County compared to the total number of reported tests that were completed by AppHealthCare and outside agencies each week in Ashe County.

**Number of People Being Actively Monitored by Week in Ashe County
(March 28, 2021 - May 8, 2021)**

This graph represents the total number of Ashe County residents that AppHealthCare staff have monitored due to being exposed to a confirmed COVID-19 case. Individuals are notified and asked to quarantine and monitor for symptoms for fourteen days.

Additional data can be found on [AppHealthCare's data dashboard](#). This data is updated each day around noon.
